OUR KEY STRENGTHS

- Highest Success Rates in Oncology & Epilepsy and bone marrow transplant Treatments
- Access to advanced medical technologies & top specialists
- Seamless coordination from arrival to recovery
- Personalized patient care & complete assistance
- Safe, transparent, and professionally managed medical journey
- Trusted clinical network with proven international outcomes

INTERNATIONAL MEDICAL TOURISM & COMPLETE PATIENT CARE SERVICES

- COMPREHENSIVE CARE ACROSS ALL SPECIALTIES
- NEUROLOGY & EPILEPSY
- ONCOLOGY & CANCER MANAGEMENT
- BONE MARROW TRANSPLANT
- DIABETES, BARIATRIC & METABOLIC SURGERY
- CARDIOLOGY & CARDIOTHORACIC SURGERY
- ORTHOPEDICS & JOINT REPLACEMENT
- SPINE & MINIMALLY INVASIVE PROCEDURES
- UROLOGY, KIDNEY & RECONSTRUCTIVE CARE
- WIDE RANGE OF SUPER-SPECIALTY TREATMENTS

ZHANIYA MEDICAL
SERVICES LLP

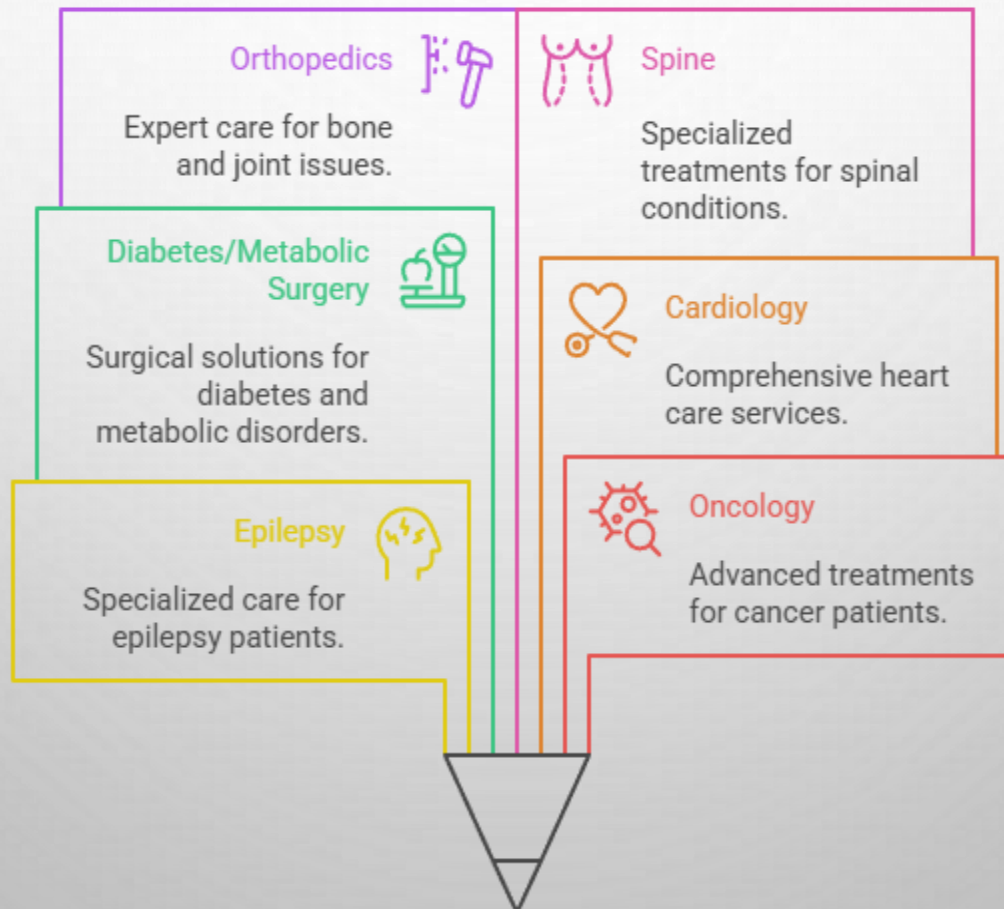

WHY INDIA

- • **WORLD-CLASS EXPERTISE:** ACCESS TOP-TIER, INTERNATIONALLY TRAINED DOCTORS AND ACCREDITED HOSPITALS.
- • **CUTTING-EDGE TECHNOLOGY:** BENEFIT FROM ADVANCED DIAGNOSTICS AND TREATMENTS LIKE ROBOTIC SURGERY, PET-CT SCANS, AND VIDEO EEG.
- • **EXCEPTIONAL VALUE:** REALIZE SIGNIFICANT SAVINGS WITH COSTS 50–70% LOWER THAN MANY WESTERN COUNTRIES.
- • **EFFICIENCY & SPEED:** EXPERIENCE FAST SCHEDULING AND MINIMAL WAIT TIMES FOR CRITICAL PROCEDURES.
- • **PATIENT-CENTRIC CARE:** ENJOY A SEAMLESS EXPERIENCE WITH DEDICATED SERVICES DESIGNED FOR INTERNATIONAL PATIENTS.

**ZHANIYA MEDICAL
SERVICES LLP**

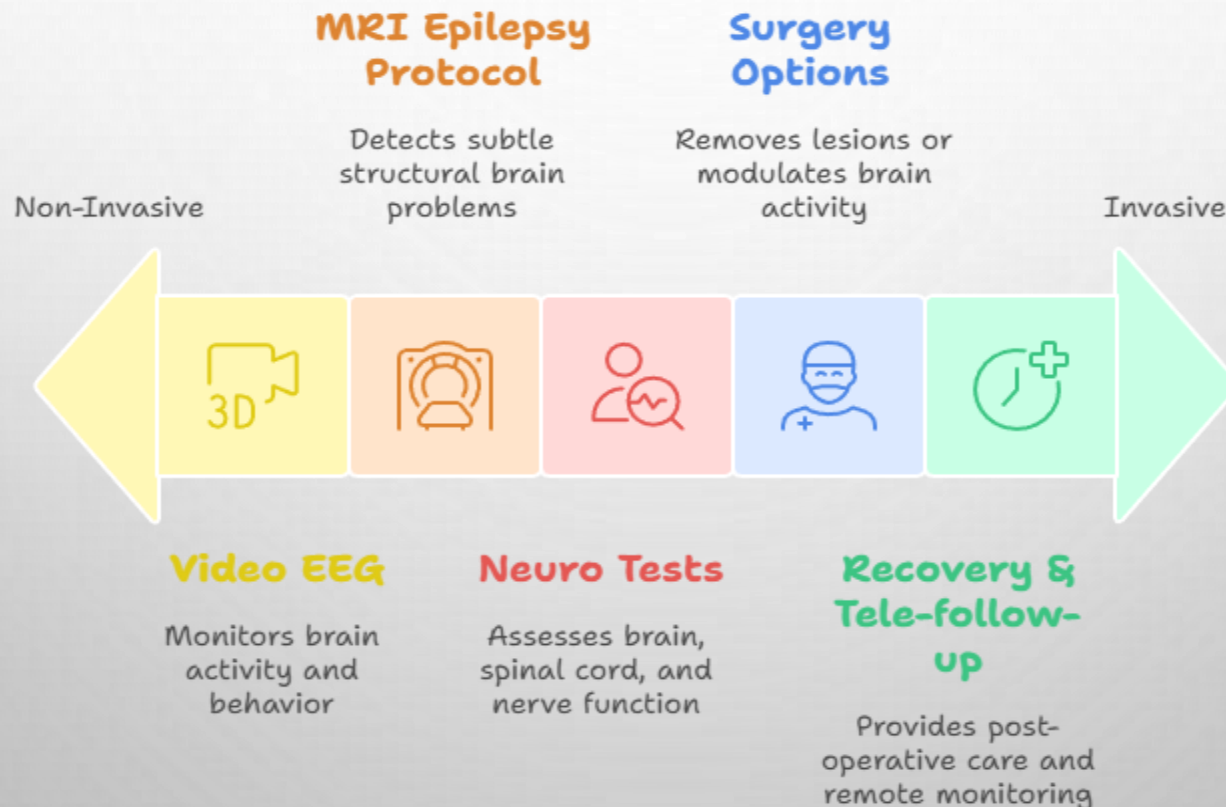

Unified Medical Expertise

**ZHANIYA MEDICAL
SERVICES LLP**

Epilepsy treatments range from non-invasive to highly invasive.

EPILEPSY TREATMENT

- VIDEO EEG (3–5 DAYS) A VIDEO EEG IS A DIAGNOSTIC TEST THAT COMBINES VIDEO AND AUDIO RECORDING WITH A TRADITIONAL ELECTROENCEPHALOGRAM TO SIMULTANEOUSLY MONITOR A PATIENT'S BRAIN ACTIVITY AND THEIR PHYSICAL BEHAVIOR
- MRI EPILEPSY PROTOCOL IS A SPECIALIZED BRAIN SCAN USING EXTRA IMAGING SEQUENCES TO FIND SUBTLE STRUCTURAL PROBLEMS (LIKE SCARS, TUMORS, OR MALFORMATIONS) THAT CAUSE SEIZURES, FOCUSING SPECIFICALLY ON AREAS LIKE THE HIPPOCAMPUS
- NEURO TESTS CHECK YOUR BRAIN, SPINAL CORD, AND NERVES FOR ISSUES WITH MOVEMENT, SENSES, BALANCE, MEMORY, AND THINKING
- SURGERY OPTIONS: LOBECTOMY, LESIONECTOMY, LASER ABLATION, VNS
- RECOVERY & TELE-FOLLOW-UP
- SURGERY: 5 DAYS (ECONOMY ROOM)✈️ STAY IN INDIA: 3–4 WEEKS💰 COST ESTIMATE: 💎 EVALUATION: 2500 USD💎 SURGERY: 17000–18000 USD (ECONOMY ROOM)📦 PACKAGE INCLUDES:✓📄 DETAILED EVALUATION✓📄 SURGERY (AS PER PACKAGE)

ZHANIYA MEDICAL SERVICES LLP Cancer Treatment Approaches

Supportive Care

Manages symptoms and side effects to improve patient comfort.

PET-CT

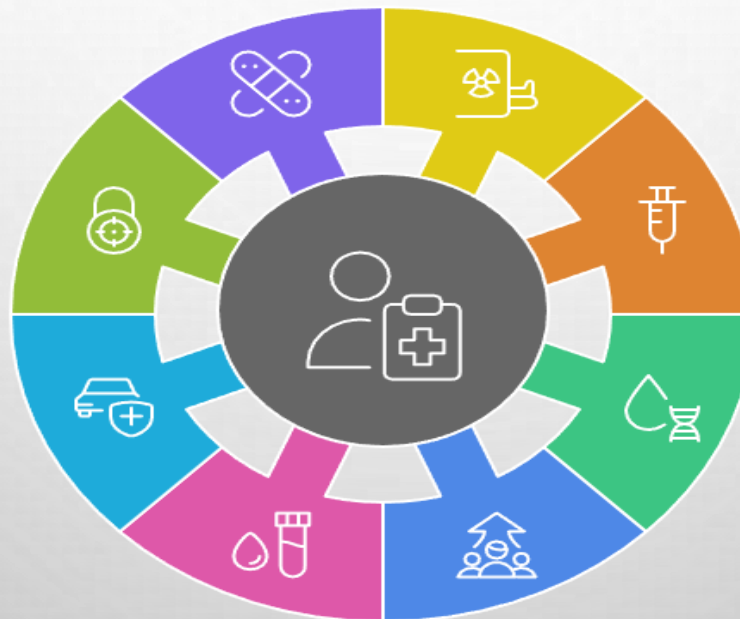

Uses radioactive tracers to detect cancer cells and monitor treatment effectiveness.

Targeted Therapy

Targets specific features in cancer cells to inhibit growth.

Immunotherapy

Boosts the immune system to fight cancer cells.

Biopsy

Removes tissue samples for analysis to determine cancer type and stage.

Molecular Tests

Analyzes cancer cells for specific genes and proteins to guide treatment.

Chemotherapy

Uses drugs to kill rapidly dividing cancer cells.

Tumor Board Planning

A team of specialists collaborates to develop personalized treatment plans.

ZHANIYA MEDICAL
SERVICES LLP

MEDICAL ONCOLOGY

- PET-CT: A TYPE OF IMAGING SCAN THAT USES A RADIOACTIVE TRACER TO HELP DOCTORS DETECT CANCER CELLS, ASSESS HOW MUCH THE CANCER HAS SPREAD, AND MONITOR TREATMENT EFFECTIVENESS.
- BIOPSY: A MEDICAL PROCEDURE INVOLVING THE REMOVAL OF A SMALL SAMPLE OF TISSUE FOR LABORATORY ANALYSIS TO DETERMINE THE PRESENCE, TYPE, AND STAGE OF CANCER.
- MOLECULAR TESTS: LABORATORY ANALYSES OF A PATIENT'S CANCER CELLS FOR SPECIFIC GENES, PROTEINS, OR OTHER MOLECULES THAT MAY DRIVE CANCER GROWTH AND HELP DETERMINE THE MOST EFFECTIVE TREATMENTS.
- TUMOR BOARD PLANNING: A PROCESS WHERE A TEAM OF SPECIALISTS (E.G., ONCOLOGISTS, SURGEONS, RADIOLOGISTS) MEETS TO REVIEW A PATIENT'S MEDICAL INFORMATION AND COLLABORATIVELY DEVELOP A COMPREHENSIVE, PERSONALIZED TREATMENT PLAN.
- CHEMOTHERAPY: THE USE OF POWERFUL DRUGS TO KILL RAPIDLY DIVIDING CANCER CELLS THROUGHOUT THE BODY, TYPICALLY ADMINISTERED INTRAVENOUSLY OR ORALLY.
- IMMUNOTHERAPY: A TREATMENT THAT BOOSTS OR CHANGES A PERSON'S OWN IMMUNE SYSTEM TO HELP IT RECOGNIZE AND FIGHT CANCER CELLS MORE EFFECTIVELY.
- TARGETED THERAPY: A TYPE OF CANCER TREATMENT THAT USES DRUGS DESIGNED TO TARGET SPECIFIC CHANGES OR FEATURES IN CANCER CELLS THAT HELP THEM GROW, DIVIDE, AND SPREAD, OFTEN CAUSING LESS HARM TO NORMAL CELLS THAN CHEMOTHERAPY.
- SUPPORTIVE CARE: MEDICAL CARE AND TREATMENT AIMED AT MANAGING THE SYMPTOMS OF THE DISEASE AND THE SIDE EFFECTS OF CANCER TREATMENT TO IMPROVE A PATIENT'S COMFORT AND QUALITY OF LIFE (E.G., PAIN MANAGEMENT, NUTRITIONAL SUPPORT, EMOTIONAL COUNSELING).

SURGICAL ONCOLOGY

- **ROBOTIC SURGERY** ROBOTIC SURGERY IS A TYPE OF MINIMALLY INVASIVE SURGERY WHERE SURGEONS USE AN ADVANCED ROBOTIC SYSTEM TO PERFORM OPERATIONS THROUGH A FEW SMALL INCISIONS. HOW IT WORKS: THE SURGEON SITS AT A CONSOLE, VIEWS A MAGNIFIED, HIGH-DEFINITION 3D IMAGE OF THE SURGICAL SITE, AND USES HAND AND FOOT CONTROLS TO MANIPULATE TINY SURGICAL INSTRUMENTS ATTACHED TO ROBOTIC ARMS. THE SYSTEM TRANSLATES THE SURGEON'S MOVEMENTS INTO PRECISE ACTIONS, AND FILTERS OUT NATURAL HAND TREMORS, ALLOWING FOR GREATER ACCURACY. KEY BENEFIT: THIS APPROACH RESULTS IN LESS PAIN, LESS BLOOD LOSS, A LOWER RISK OF INFECTION, SMALLER SCARS, AND A FASTER RECOVERY TIME FOR THE PATIENT COMPARED TO TRADITIONAL OPEN SURGERY
- **HIPEC (HYPERTHERMIC INTRAPERITONEAL CHEMOTHERAPY)** HIPEC IS A SPECIALIZED, INTENSIVE CANCER TREATMENT FOR ADVANCED ABDOMINAL CANCERS THAT HAVE SPREAD TO THE LINING OF THE ABDOMINAL CAVITY (PERITONEUM). IT IS A TWO-STEP PROCEDURE: STEP 1: CYTOREDUCTIVE SURGERY (CRS): THE SURGEON FIRST PERFORMS MAJOR SURGERY TO METICULOUSLY REMOVE ALL VISIBLE CANCEROUS TUMORS FROM THE ABDOMINAL CAVITY .STEP 2: HEATED CHEMOTHERAPY: IMMEDIATELY AFTER THE VISIBLE TUMORS ARE REMOVED, A STERILE CHEMOTHERAPY SOLUTION IS HEATED TO A TEMPERATURE SLIGHTLY ABOVE NORMAL BODY TEMPERATURE (AROUND 41-43°C OR 106-109°F) AND CIRCULATED THROUGHOUT THE INSIDE OF THE ABDOMEN FOR ABOUT 60 TO 90 MINUTES . KEY BENEFIT: THE HEAT ENHANCES THE CHEMOTHERAPY'S ABILITY TO KILL ANY REMAINING MICROSCOPIC CANCER CELLS, WHILE THE LOCALIZED DELIVERY MINIMIZES THE SYSTEMIC SIDE EFFECTS TYPICALLY ASSOCIATED WITH STANDARD INTRAVENOUS CHEMOTHERAPY THAT TRAVELS THROUGHOUT THE ENTIRE BODY.
- **BREAST CANCER:** ORIGINATES IN THE CELLS OF THE BREASTS, MOST FREQUENTLY AFFECTING WOMEN [1].
- **GI (GASTROINTESTINAL) CANCER:** A GROUP OF CANCERS AFFECTING THE DIGESTIVE SYSTEM ORGANS, INCLUDING THE ESOPHAGUS, STOMACH, COLON, AND RECTUM [1].
- **LIVER CANCER:** STARTS IN THE CELLS OF THE LIVER, THE ORGAN RESPONSIBLE FOR FILTERING TOXINS AND AIDING DIGESTION [1].
- **HEAD & NECK CANCER:** ENCOMPASSES VARIOUS CANCERS THAT ORIGINATE IN OR AROUND THE THROAT, LARYNX, SINUSES, NOSE, OR MOUTH [1].
- **THORACIC CANCER:** PRIMARILY INVOLVES CANCERS LOCATED IN THE CHEST CAVITY, MOST COMMONLY LUNG CANCER AND ESOPHAGEAL CANCER [1].
- **GYNAE (GYNAECOLOGICAL) CANCER:** CANCERS THAT START IN A WOMAN'S REPRODUCTIVE ORGANS, SUCH AS THE CERVIX, OVARIES, UTERUS, VAGINA, AND VULVA

GASTROINTESTINAL SURGICAL PROCEDURES

- **SLEEVE GASTRECTOMY:** A SURGICAL PROCEDURE WHERE A LARGE PORTION OF THE STOMACH IS REMOVED, LEAVING A SMALLER, BANANA-SHAPED "SLEEVE"
- **GASTRIC BYPASS:** A MORE COMPLEX OPERATION THAT INVOLVES CREATING A SMALL STOMACH POUCH AND REROUTING THE SMALL INTESTINE TO IT, CHANGING HOW THE BODY HANDLES FOOD [
- **MINI BYPASS (SINGLE ANASTOMOSIS GASTRIC BYPASS - SAGB/OAGB):** A VARIATION OF THE GASTRIC BYPASS THAT INVOLVES ONLY ONE CONNECTION (ANASTOMOSIS) INSTEAD OF TWO, SIMPLIFYING THE PROCEDURE
- **70–90% DIABETES REMISSION:** BARIATRIC SURGERY IS HIGHLY EFFECTIVE AT IMPROVING OR RESOLVING TYPE 2 DIABETES. REMISSION RATES VARY BY THE SPECIFIC PROCEDURE PERFORMED AND INDIVIDUAL PATIENT FACTORS
- **FOLLOW-UP & NUTRITION CARE:** COMPREHENSIVE, LONG-TERM POST-OPERATIVE CARE, INCLUDING REGULAR MEDICAL CHECK-UPS AND DIETARY COUNSELING FROM REGISTERED DIETITIANS, IS CRUCIAL FOR LONG-TERM SUCCESS AND MANAGING NUTRITIONAL NEEDS AFTER SURGERY

COST STRUCTURE

- “PRICING IS DETERMINED BY THE SELECTED HOSPITAL. OUR NETWORK SPANS INDIA’S MOST TRUSTED HEALTHCARE BRANDS LIKE MAX, FORTIS, AND APOLLO, ENSURING WORLD-CLASS TREATMENT AND PATIENT COMFORT.”
- - ROOM TYPE ECONOMY/GENERAL WARDS (MOST SHARED, CHEAPEST) TO DOUBLE SHARING, OFFERING PRIVACY CURTAINS FOR TWO, AND THEN SINGLE PRIVATE ROOMS (MOST EXPENSIVE, FULL PRIVACY), UP TO DELUXE/SUITES
- - SURGERY COMPLEXITY CATEGORIZE PROCEDURES FROM MINOR TO MAJOR BASED ON FACTORS LIKE INVASIVENESS, OPERATIVE TIME, EXPECTED BLOOD LOSS, RISKS, REQUIRED SKILL, AND RESOURCES,
- - MEDICINES & ICU DURATION OF STAY: THE PRIMARY DRIVER OF COST VARIATION IS THE LENGTH OF TIME A PATIENT REQUIRES ICU CARE AND MEDICATION.
- SEVERITY OF CONDITION: THE COMPLEXITY OF THE PATIENT’S ILLNESS AND THE LEVEL OF INTERVENTION NEEDED DIRECTLY IMPACT RESOURCE CONSUMPTION AND COST.
- LOCATION/HOSPITAL: COSTS CAN DIFFER SIGNIFICANTLY BETWEEN DIFFERENT HOSPITALS AND GEOGRAPHIC REGIONS.
- MEDICATION CHANGES: LONG-TERM TREATMENT OFTEN INVOLVES ADJUSTING MEDICATIONS OR USING NEW, SOMETIMES MORE EXPENSIVE, DRUGS AS THE PATIENT’S CONDITION EVOLVES.
- ESTIMATED COST: PROVISION OF TRANSPARENT AND COMPREHENSIVE INITIAL COST PROJECTIONS.
- UPDATED PRE-SURGERY COST: TIMELY COMMUNICATION OF REVISED COST ESTIMATES PRIOR TO THE PROCEDURE.
- FINAL BILL TRANSPARENCY: ENSURED ACCURACY AND CLEAR ITEMIZATION OF THE FINAL STATEMENT.

WHY US

- • FAST VISA ASSISTANCE
- • AIRPORT PICKUP
- • INTERPRETER SUPPORT
- • BEST DOCTOR RECOMMENDATIONS
- • TRANSPARENT COST
- • COMFORTABLE STAY
- • 24/7 SUPPORT
- • POST-TREATMENT FOLLOW-UP
